VISHNU INSTITUTE OF TECHNOLOGY::BHIMAVARAM

(AUTONOMOUS)

2.3.1 - Student-centric methods such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

❖ **Innovative assignments and Real time problems**

Assignments are given based on the real-time engineering problems, to help students to understand and come out with the solutions. Group assignments are also given to improve the self learning and team work of students.

❖ **Technical Presentations**

Students are encouraged to give presentation on any technical topic in their area of interest which will serve for knowledge transfer and to overcome stage fear. It will also improve their communication skills which is significant in their career growth.

❖ **Project Based Learning**

The CSE Department frames its curriculum in such a way that students acquire the skills to design and create complex Electronics systems through various activities including projects. Such projects often force students to use multiple learning techniques to succeed, which includes research, logical deduction, and iterative learning (trial and error). Since these projects are usually too large and complex for one student to do alone, project-based learning

also tends to encourage teamwork. Project exhibitions are conducted in the department every year to enrich the project developing skills of the students.

❖ Training/Workshops

Training and workshop are organized for students to bridge the gap between theoretical learning and practical training in a real-life environment.

- ❖ A Two Week Workshop On “Real time experience on IoT technologies” during 15th – 28th APRIL 2022.

VALIANT 2K22 ROBO SOCCER

VALIANT 2K22 Project Expo

PROJECT EXPO

It is an excellent platform for students to mould their thoughts into an application by exhibiting their innovative projects in a competitive environment where they can prove their talent and creativity. Project Expo is a technical event in which the students showing their innovative projects and developed for solving real time problems.

There are 10 teams participated in this event from many colleges.

Some of the projects are

- Smart Car Parking System Using IOT
- AH Meter
- Bio Inspired Robotic Predatory Bird to Scare Crop Eating Birds in Agricultural Field
- Single Axis Solar Tracker and Panel Protection from Heavy Rain
- water Management for Paddy Crops
- Universal Smart IOT Based Water Manageable System

WINNERS

1st Prize - K.Lalith, Madhavan, Varun from KPRIET

2nd Prize - N.Harshini, M.Nikshipta from BVRIT
