

Sensitization of students and employees of the institution to constitutional obligations: values, rights, duties and responsibilities of citizens:

Vishnu Institute of Technology is committed to providing comprehensive education to its students by creating awareness about constitutional rights, values, duties, and responsibilities. This is accomplished through various means, both within and outside the curriculum.

Sensitizing students and employees of the institution is achieved through the inclusion of relevant topics in the curriculum as well as through extracurricular activities. Subjects such as the Constitution of India, professional ethics, and human values play a crucial role in familiarizing students with the values, rights, duties, and responsibilities of citizens. The Constitution of India subject covers constitutional rights, duties, and responsibilities that citizens should uphold. Professional ethics and human values are mandatory subjects across all engineering and technology programs, ensuring students are well-versed in these areas.

To provide a broader perspective, students are required to take a course on Environmental Studies in their first year. This course enlightens them about various environmental acts, wildlife protection acts, forest acts, and global environmental concerns.

The institute also organizes seminars and workshops on important national days to enhance awareness among students and faculty. Additionally, the NSS unit of the institution conducts activities recommended by the Government of India, both within the college campus and in nearby villages.

Through these initiatives, Vishnu Institute of Technology fosters an environment where students gain knowledge, understanding, and a sense of responsibility towards their constitutional rights, values, duties, and responsibilities as responsible citizens.
